My wife and I read a chapter or two from this book maybe once a month. We've owned it for a while, and are still working our way through it. Our different personalities definitely came into play, and on the very first night reading it we learned things about one another that perhaps only time would have taught us. I will say that I don't think it's a self help book that can help you fix your marriage. My wife

and I are reading it from a point where (this may be crazy to some) we actually like each other. We really are best friends, we weren't nervous on our wedding day (yes, we bought the book after we got married), and we are both serious about making our marriage work. We argue with each other still, we disagree, we're not living out some perfection of idealized marriage - but I think we've got one of the strongest marriages of anyone we know. I credit that in part to reading books like this one. You can buy a men's workbook and women's workbook to accompany the actual book, and while it's more money - it's the workbook exercises that make reading this together SO MUCH fun! I was initially upset when we got the workbooks because they are identical except my copy says "your wife" and "her", and her copy says "your husband" and "him". It's also a little extra money, but I'd still encourage you to get them... and to actually get both the husband's and wife's copy. If your marriage isn't worth investing a bit more money into, well, that may be a sign that you haven't yet invested enough and you should spring for a bit more. Plus the workbooks are cheaper than counseling or divorce, so that's good! What kind of stuff will you learn? Well, for example, in my family growing up my sister set the table for dinner.
