# The Connected Child: Bring Hope And Healing To Your Adoptive Family

## Synopsis

"An extremely useful parenting handbook... truly outstanding ... strongly recommended." --Library Journal (starred review) "A tremendous resource for parents and professionals alike." --Thomas Atwood, president and CEO, National Council for Adoption The adoption of a child is always a joyous moment in the life of a family. Some adoptions, though, present unique challenges. Welcoming these children into your family--and addressing their special needs--requires care, consideration, and compassion. Written by two research psychologists specializing in adoption and attachment, *The Connected Child* will help you: Build bonds of affection and trust with your adopted child Effectively deal with any learning or behavioral disorders Discipline your child with love without making him or her feel threatened "A must-read not only for adoptive parents, but for all families striving to correct and connect with their children." --Carol S. Kranowitz, author of *The Out-of-Sync Child* "Drs. Purvis and Cross have thrown a life preserver not only to those just entering uncharted waters, but also to those struggling to stay afloat."--Kathleen E. Morris, editor of *S. I. Focus* magazine "Truly an exceptional, innovative work . . . compassionate, accessible, and founded on a breadth of scientific knowledge and clinical expertise."--Susan Livingston Smith, program director, Evan B. Donaldson Adoption Institute "The Connected Child is the literary equivalent of an airline oxygen mask and instructions: place the mask over your own face first, then over the nose of your child. This book first assists the parent, saying, in effect, 'Calm down, you're not the first mom or dad in the world to face this hurdle, breathe deeply, then follow these simple steps.' The sense of not facing these issues alone--the relief that your child's behavior is not off the charts--is hugely comforting. Other children have behaved this way; other parents have responded thusly; welcome to the community of therapeutic and joyful adoptive families." --Melissa Fay Greene, author of *There is No Me Without You: One Woman's Odyssey to Rescue Africa's Children*

## Book Information

Paperback: 288 pages

Publisher: McGraw-Hill Education; 1 edition (April 22, 2007)

## Customer Reviews

If you are thinking about adopting a child from a foreign country or even a child who has been shuttled from foster home to foster home, you must read this book first if you want to raise a happy and healthy child. There are dozens of parenting books on the market, but what makes this book so very special is the authors' ground-breaking, empirical research with adopted children. Their research has been done at Texas Christian University in Fort Worth, TX ([...]) Their discoveries and methods are unique because they use a wholistic approach to healing the wounded child. The result is that they are quietly creating miracles as their methods are learned by others and spread around the world. Their research is also helping other at-risk children, including those with autism. According to the authors, structural changes take place in the brains of infants who were abused or deprived prior to adoption. Unfortunately, it is common practice in some foreign orphanages for babies to be laid on their backs for 24-hours a day, with a bottle propped into their mouths, and lying in soiled clothing. They are never cuddled or talked to because it makes them cry for more attention. These orphanages become eerily silent as babies eventually give up their voices. Similarly, toddlers beg for food from their cribs, only to be ignored. Many children are sexually abused in these orphanages. Many adoptive parents believe that all they have to do is adopt the baby, and love and nurture it, and everything will be fine. However, the authors' research shows that these parents are about to face the biggest, and perhaps the most expensive, challenge of their lifetime.

We're the parents of a couple of adopted kids, and have continually searched for specific information about adopted children with broad-spectrum diagnoses (ADHD, ODD, RAD, Bipolar Disorder). At one time or another, our kids have had all of these diagnoses attached to their issues/behaviors. It's become clear to us -- and other parent of adopted kids with whom we speak -- that these broad-spectrum diagnoses are "convenient" terms in which to bucket our kids. These kids frequently show the same issues and inappropriate behaviors. Unfortunately, the standard process for addressing these issues (positive reinforcement, drug therapies, structured responses, diet modifications) never seem to work. This appears especially true of those kids, such as our daughter, who are adopted from Eastern European institutions/orphanages. We've read all of the general literature regarding these broad-spectrum diagnoses and tried every guideline in these books on

how remediate these issues and bad behaviors -- all with little or no success."The Connected Child" speaks directly to the behavioral issues and unique emotional requirements that these adopted children require. Their approach -- based on the TCU Institute of Child Development methodology --is more a process for modifying parent behavior than addressing the child's issues and behaviors. Specifically, the book suggests that all of these kids exhibit behaviors based on perceived threats and fears established/learned during their earliest years in institutions. It recommends that parents develop -- and consistently reinforce -- a loving, affectionate, trusting and safe environment for these kids so that they can grow away from viewing people and life situations in a fearful or threatening way.
