## Customer Reviews

Purchased all three of these study cards after buying the Rosetta Stone program. While the Rosetta Stone was working fine, I realized that I was having issues with verbs, etc. that really were not being discussed in the first steps of the Rosetta program. These cards are great and I would recommend them to anyone learning a new language. They provided enough information to be able to clarify what I was hearing on the Rosetta program, making the verbs, tenses, etc. all make sense.

I love this grammar review sheet as I am in my third semester of college French and am still working on keeping all the different tenses straight. It is perfect for a quick review before I begin doing homework or right before a quiz or exam! It has holes in the side so that it fits into a binder, which is perfect for me. It also has examples of everything, so if I get stuck I can simply check this first. It is like pulling all the important sections on grammar out of the textbook and putting them on one sheet! I recently ordered the Quickstudy for French Verbs and am very excited to see if it is as helpful as this counterpart. Will possibly update later.

I bought the three (French grammar, verbs and vocabulary) as they were recommended by both

and my french instructor..These sheets fit nicely in my binder and will last a long time which is great because they have been a huge help in reading, writing and speaking for class..Would strongly suggest anyone who is going to seriously study french or any other language to buy the Quickstudy products from as they are less expensive than the school book store!

As with the French Vocabulary and French Verbs, this lightweight little number fits easily into a 3-ring binder OR on the kitchen cabinet above the sink (where I put it) for easy learning while washing :)

This is a good summary of French grammar, including verb tenses. However, the tenses could be explained in a little more detail for the beginning French student, so I would recommend it for the intermediate French student. Laminated 8 1/2" x 11" booklet that fits most notebooks.

This paper-sheet-sized plastic laminated folding chart can easily fit inside many books and certainly a satchel or backpack -- taking up little space. By title, it only claims to be a quick study outline of French grammar. Yet, other basic topics such as French numbers [cardinal and ordinal], French pronunciation and WEATHER expressions -- are covered -- before entering into totally systematic concise-and-precise coverage of primary [and beyond] French grammar topics as expected. The WEATHER expressions are very useful in particular. As in most languages, WEATHER expressions can be used in various ways to express "atmospheric spirit" -- without having to resort to overly complex poetry or prose +++

I have trouble keeping all of my tenses straight and this has been great for a quick reference. However, unless you already know what you're looking at, it might be a little tricky to understand, so I recommend it for students that have had at least an introduction to verbs and the different tenses. But for my purposes it's been really helpful. It's very durable and fits easily in a binder.

Bought this for my first year High Schooler who takes French. He loved it and put it right into his French Binder (has 3 ring binder holes punched into it). Good lamination, thick and you can tell it will stand up through the year or two of French for an active student. Today was his first day in school, his friends were impressed and want them for themselves. His French teacher praised him for a smart buy and being prepared. It also is easy to understand and put together so it's easy on the eyes as well as it covers the major things needed in french class.
