How many times had I heard, "yup, he's all boy" or "he sure is active", or "he just needs a good spanking"...but I always felt that no one truly understood what I was going through with my "spirited" child. I read "The Strong Willed Child" by Dobson, I read "The Discipline Book" by Dr. Sears, still nothing seemed to explain the problems I was having with my child. I had just about decided that I must have done something wrong to make him behave the way he does, when I found this book. What a relief! It isn't anything I have done to make my son the way he is. But the book gave me such practical and effective advice on how to work with his personality instead of against it. Any parent of a spirited child will tell you that traditional discipline techniques don't work. Time outs? Are you kidding? I'd have to tie my kid into a chair or lock him in his room! Now I realize what sets him off and I can often avoid the "naughty" behavior. No more quick trips to the bank or grocery store after preschool. He is totally tapped out by the time he gets home, and it is time for quiet/alone time in his room so he can recharge and be sociable again. My parents kept telling me he should be sleeping through the night, when at age 2 he still was waking up during the night. In their eyes, he was just spoiled. "Let him cry" they would say. What they didn't understand, was that a spirited child does not cry themselves to sleep like other children, they cry themselves awake! Sometimes to the point of vomiting because they get so worked up! I could go on and on, but the bottom line is, this book truly saved my sanity. I feel like a better parent as a result of it and I know my relationship with my son has improved dramatically.

I read maybe 15 pages of this book before bursting into tears of relief. At 16 months old, my son has never been easygoing or mellow, but as he entered toddlerhood, I felt like I was failing as a mom because I couldn't control him. I didn't understand why other kids napped for hours, slept through the night at 6 months old, and adjusted quickly to new experiences, while my son still wakes up several times a night, rarely naps for more than an hour a day, and shrieked in rage when he had to start wearing shoes or when he didn't like how his socks felt. Other books recommended a stern, inflexible parenting approach that just resulted in MORE meltdowns, MORE stress, and MORE frustration. Did I mention that "cry it out" was an unmitigated disaster in our house? Finally, this book validated him, and my husband and me. He's not "bad", we're not failing as parents. He's just more

intense, more perceptive, and more sensitive. It takes different strategies for us to be successful and calm than for parents of more relaxed children, but the book really focuses on how to do that, how to help our child be successful with daily life. There are many different levels to any given "spirited child", so this book's scope is not limited to a high-energy kid. Introverts vs. extroverts, energy levels, sensitivity, and so much more are covered in depth. This is not a book about excusing poor behavior, though. The parent is absolutely still the one in charge and still has to work with the child to ensure that they can be spirited and still be productive, safe, and enjoyable members of their family. If you feel like you're constantly battling it out with your child, that you've lost control, and/or that your child is running you ragged, I highly recommend this book. Oh, you'll probably learn a few things about yourself, as well.

OK, so I was totally flabbergasted and flummoxed with rearing my first-born. He was a joy and a gift, but with energy beyond other children (and adults!!) and a stubborn streak a mile wide. Still, I couldn't bring myself to read childrearing books with titles that made my son sound horrible (I wasn't raising a difficult child, I was having difficulty raising my child). Then, a real gift -- Mary Sheedy Kurcinka's RAISING YOUR SPIRITED CHILD. Ms Kurcinka is a professional and a parent, and she understands that parents need a) help, and b) humor. Her positive attitude about children, and her down to earth discussions of the needs of parents, children and families were a welcome relief. If you think that your child is more energetic and/or sensitive and/or persistent than other kids, you are right; and if you think others don't understand your frustrations, you are also right. Ms. Kurcinka explains that "spirited" children are different than most others, and need different approaches. She guides the reader to understand what makes these special children tick, and why parents react the way they do to their children. She also urges a positive, rather than a negative, view of these children's differences. From the feelings we have to our kids to the words we use to describe them, we shape who they are and how we treat them. Ms. Kurcinka shows how to enjoy and celebrate the energy and talents of children whose temperaments are outside the norm. We were fortunate to read this book when our spirited son was two -- and doubly grateful when his spirited sister arrived a year later!! If you are frustrated with the books available about children, or if you want a positive, practical book about extraordinary kids, this is the one.
