Good Life, Good Death

Synopsis

Who are we? Where did we come from? Where are we going? How do we get there? Many have asked these questions, and many have attempted to answer them. But there is another question Good Life, Good Death asks us to contemplate: how does the idea of life after death affect how we live our lives? Gelek Rinpoche tells stories of the mystical Tibet he lived in, as well as the contemporary America he is now a citizen of, and shares the wisdom of the great masters. He asks us to open our minds and see if we can entertain a bigger picture of life after life, even for a moment. He makes the connection between powerful emotions such as anger, obsession, jealousy and pride, and our past as well as our future.

Gelek Rinpoche's book is one of the most practical and relevant books that you will ever read. If you've ever wondered about reincarnation and what happens after death, you won't be disappointed. One of the best gifts that Gelek Rinpoche has is that he can take deep material and make it accessible - this book is very readable, and you will find no pretension in the prose - it is lucid, instructive and to the point. Throughout the book, the author's refreshing sense of humor manages to shine through. After dealing with death and the Tibetan take on the subject, we are then presented with practical advice and instructions on how to live and cope with this very precious life that we have been given. The book also includes a daily practice in the appendix. Gelek Rinpoche has written a book that is brilliant and useful; it is a book that I'm sure I'll re-read numerous times in

the future.

Rimpoche Nawang Gehlek's *_Good Life, Good Death: Tibetan Wisdom on Reincarnation_* is a humane account of the dying process, particularly of the very subtle experiences of death when a person's consciousness dissolves. Gehlek draws upon his own personal experiences with dying persons (through sixty-plus years of life) as well as the numerous Tibetan Buddhist texts that focus on death and dying. The latter tradition has a scientific precision in its analysis of death, furnishing valuable, specific information for any person, regardless of his or her religious beliefs. Rimpoche Nawang Gehlek's mix of personal experience and Buddhist empiricism makes for a wonderful book. Rimpoche Nawang Gehlek is incredibly humble about his experiences. He explains in a frank manner how he came to his views on reincarnation and the dying process. His style is non-dogmatic, and his writing is easy to understand. For instance, he writes early in the book, "I'm not here to try to convince you about reincarnation. That's my culture, my system--not yours. I would simply like to ask you to entertain the idea for a moment, to give it the benefit of the doubt and see how it changes your perspective on your life and your death." In this context, he discusses the anxieties he had when he began his own investigation into the dying process, first as an eleven year old novice monk in a Tibetan monastery and then later as an adult living in America. In an early chapter, he describes how frightened he was when he first heard Buddhist teachings on the lower realms: "I was crying constantly, day and night. I was soaked in tears from the fear of falling into the lower realms--and from a slightly artificial compassion at the thought of others falling into them." With similar candor, the book then describes methods to prepare for death, both when one is healthy and when one is at the actual time of death. These instructions about death, ironically, provide a manual for living a good, productive life, where fear is replaced by a well-trained mind and a positive, loving outlook. Rimpoche Nawang Gehlek includes a long poem, entitled "Do the Meditation Rock," by his late friend Allen Ginsburg. This poem and Gehlek's reminiscence of Ginsberg's own death offer a vivid sense of what actually happens at death. At the conclusion of the book, he offers this simple advice for achieving a clear mind and outlook: "Keep a watch on anger, attachment, and Ego all day long." This is the root of the practice of training the mind. As a complement to *_Good Life, Good Death_*, another excellent book with specific information about the dying process is Geshe Kelsang Gyatso's *_Living Meaningfully, Dying Joyfully: The Profound Practice of Transference of Consciousness_*. Geshe Kelsang's book outlines in even more detail--like an artist's fine brushstrokes on a canvas--the actual meditation practices a person can engage at his or her own time of death or to assist loved one's during this time. *_Good Life, Good*

Death_ contains priceless instructions, based on the accumulated wisdom of an on-going tradition of knowledge and the depth of personal experience.

I had read this book a very long time ago and then gave the book away. I have had a recent interest in Tibetan buddhism and for some reason purchased this book again. It was a very wise choice. The book is very easy to read and very worthwhile. Nothing is confusing and the principles explained all make a lot of sense. I feel that if everyone read this book we would have a much better world. I highly recommend this book. I know I will reread it many times again.

After reading this book from the library, I felt I needed to have a copy on hand to read over and over. There are so many insights into why we are here in this lifetime and even explains the journey to death and rebirth. The language is simple and easy to comprehend. Very meditative to read. I felt it took away some of my fear of death. I recommend this book to those seeking more understanding of life and death.

I got this as a second or third copy because I'd given away the previous ones. Excellent and clear presentation on preparing for death by living an ethical life in the present moment. After reading this, I got some other books by him.

great wisdom. I'm glad the African wisdom from kemet has survived in Tibet. Unfortunately, the racist Chinese will probably wipe it all out. I pray to the creator that they or western Christians, don't.
