ISBN-13: 978-0899332819

Product Dimensions: 10.8 x 0.4 x 15.3 inches

Shipping Weight: 12 ounces (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars [See all reviews](#) (68 customer reviews)

Best Sellers Rank: #230,024 in Books (See Top 100 in Books) #156 in [Books > Travel > United States > Midwest](#) #191 in [Books > Reference > Atlases & Maps > Atlases & Gazetteers](#) #379 in [Books > Reference > Atlases & Maps > United States](#)

Customer Reviews

We've used Gazetteer maps for decades. When you need detailed maps for an area, including all the little podunk back roads, you just can't beat these. "Well, I use my GPS!", I hear someone saying. Yes, I use a GPS in the form of my Android phone. It's a great little device, but sometimes I lose a signal and -- crud! -- the phone reboots for some reason or the focus is lost on my navigation. Then the phone tries to access its data connection to no avail. It's good to have a backup plan. Just sayin'. This atlas is a must-have in your car. Pick your state and be prepared!

I love the idea of this map, but it is not as detailed as I would like it to have been. If you live in the city like we do, a lot of streets are missing. The producer of this map should have at least added extra pages for larger cities to be shown in more detail (like Akron, Cleveland, etc.). I would be

willing to pay more for a map that had more detail. Other than that, this is a very useful map when you are in Holmes county. But if you are not very good at directions or reading maps, you would still do better with more detail, even in smaller cities.

old school but well detailed. My NAV system is rigid and inflexible and makes it hard to plan the best routes. These map books are very detailed at a scale that really helps when out on the road. They aren't as good for navigating through towns, but perfect for exploring the country side. too bad they are discontinued, but you can still find them on the secondary market.

Delormes are the best maps made they show every little road even farm roads in the state. So maps will show you little off shot road that you have to drive through small creeks to get to even! This map rocks if you like to be out in the country like we do. We carry them in both our cars always!

I am relatively new to Northeast Ohio and bought this as a way to know the state better. When cities or areas are mentioned in books, television, and radio I refer to this Atlas to see where the particular city is. I found this book to be accurate and easy to read and understand. It is detailed, and is very well organized in its detail.

We picked up our first Ohio Atlas and Gazetteer back when we were living in Ohio for a three and a half year period. I found it most useful for exploring an area and finding off-the-beaten-path locations. Time and again we were able to take lightly-traveled shortcuts that avoided towns and saved us time. The gazetteer is great not just for finding time and gas-saving routes. But for those of us who are interested in topographical features, out of the way lakes and little ponds, and even the smallest of streams and creeks, the Gazetteer can't be beat. You'll find all of these and more in the Gazetteer. Because I've traveled extensively throughout the greater Midwest I've collected Gazetteers from a number of states, and I've never been disappointed.

These Gazateers are a must for traveling to a new location, they will point out points of interest on a county level and show you the State and private camping areas, as well as giving you a brief write up on places to see and things to do. It will also show you bike trails, as well as hiking trails that one may wish to utilize. They can be a real must for when traveling to a new state.

I bought this for a cross-state trip with my 13YO son in our 1979 MGB. He was the navigator. About

two hours into the trip he missed a turn, but then we passed a lake. He saw the lake on the map and concluded we were off course. This map has great detail and we take it whenever we go on an outing. In this day of Google Map directions and GPS, having a map like this to refer to is a pleasant -- and useful -- alternative
