The MBA Application Roadmap: The Essential Guide To Getting Into A Top Business School

Synopsis

Since 2001, when she launched Stacy Blackman Consulting, Stacy Blackman has helped clients gain admission to every top business school in the world. Stacy has been profiled in several publications, including Fortune Magazine, BusinessWeek, and the Wall Street Journal. Since his graduation from the Harvard Business School, Daniel J. Brookings has worked as a strategy consultant. Since 2003, Daniel has advised scores of MBA applicants on how to create an effective personal branding strategy and craft compelling applications. Now Stacy Blackman and co-author Daniel J. Brookings share their MBA admissions secrets in this concise guide, featuring 56 short, easy-to-digest chapters! From the Book... If you are reading this book, you have taken a solid first step in your business school admissions process. Some people will argue that the applications are harder than the curriculum. So, don't give up-business school will be a breeze if you can survive the grueling admissions process! . The challenge is the process of reflection and introspection that can be terrifying and truly daunting. If done correctly, it can also be revealing and personally rewarding, not to mention exhilarating when you end up attending a dream school and hopefully altering the course of your life.

Customer Reviews

While I am a GMAT tutor and naturally focus solely on that part of the quest for business school admissions, it's important to keep the test in perspective. As big of a challenge as the exam can seem, it is only part of the MBA application process. Other aspects of the process, such as essays,

can be every bit as challenging and time-consuming. There are plenty of books on the market to help you get from "I want to go to B-School" to "I'm in!" but it wasn't until I recently read *The MBA Application Roadmap* that I found one I could enthusiastically endorse. Authors Stacy Blackman and Daniel J. Brookings have put together a concise handbook that gives you a plan and then walks you through the steps required to get there. Blackman is well-known for her admissions consulting service, and her experience is evident throughout the book. Most striking in the first several chapters of the book is the emphasis on getting started early. Blackman and Brookings encourage you to give yourself several months to research schools, prepare for and take the GMAT, draft essays, and manage recommenders. The authors start from the very beginning, explaining the various factors that should go into your school selections. In my experience (and in theirs), too many students decide on one or two programs simply because of familiarity or a top ranking. Researching more possibilities will not only expand your options, but will also come in handy when tailoring your essays to each school's admissions committee. Nearly half of the book is devoted to application essays, and this is where you'll find the most valuable advice. By necessity, most of the tips are general in nature, but regardless of your specific situation, you'll find plenty to help you improve your application package. I wish I had always been able to point my students to this book, because it answers so many of the questions I've been hearing for years, including: How much should your essays be tailored for individual programs? Should you write an optional essay? How can you effectively handle topics such as your biggest weakness or failure? What tone should you strike in the essays? *The MBA Application Roadmap* weighs in at well under 300 pages, and reads even faster than that. While it's very concise, that doesn't mean it's not valuable. Many of the strategies the authors share sound simple, but far too many B-School aspirants fail to use them. I don't want you to make the same mistake. The book's content is divided into over fifty brief chapters, making it easy for you to use it as a reference guide. After an initial quick read (I went through it in about two hours), you'll go back to it many times as you choose target schools, draft essays, and put the finishing touches on your application package.

This book is chock-full of great advice and tips for mastering the MBA admissions application process. It helps you think about your application from a whole different perspective. It provides a great roadmap for branding yourself and includes tips on each phase of the process from school selection to essay writing to interviews. I highly recommend this book to anyone embarking on the application process.

This is the first book that I've read from front to back regarding the MBA admissions process. It is chocked full of great advice, anecdotes, and helps to demystify the process. It adequately puts forth what the MBA admission boards are looking for in an application, and how to *market* yourself without coming across as overly-confident or too flawless. There are some essay writing tips that I'm fortunate to have read because it guided me away from committing certain follies in my essays that I had planned to commit! One being starting my essays with the intention to create a mystery. If you're concerned with the content being too old (the book was published in 2009), rest assured that the content is still relevant, and I can imagine it being so for many years to come. This may be minor, but I was surprised with how many chapters this book has. It struck me as being poorly structured, although it does not take much away from the quality of the content of the book. The main shortcoming of this book is the lack of actual recommendations and essays. Perhaps it was not the goal of this book, but the addition of actual essays would have improved the usefulness of this book tremendously. As a result, I'm subtracting two stars. I had to refer to essays in "How to Get into the Top MBA Programs" by Richard Montauk to get the look and feel of actual essays and recommendations.

I found the book to overpriced for its content. If you just need a very brief overview of the application process, this book may be Ok, but it gives you no application strategies, other than some pep talk about - being yourself, be truthful about your weaknesses, and all that. I think other books from Avi Gordon, Omari, Paul Bodine and Chioma are much much better, as they present clear application strategies. Omari's book profiles the various MBA schools, and is a good place to look when you want to choose which schools to apply to. Paul, Chioma and Avi do a good job of strategizing your app.

The MBA Application Roadmap: The Essential Guide to Getting into a Top Business School Thank you for such an informative online booklet. I am immensely benefitted by going through it as it helped me understand the practical route to admission and probability of success in getting admission to an MBA course which is highly competitive.

I began looking into an MBA with several ideas of my own on how to proceed, and this book opened up my eyes to what I was missing and where I was misguided. It is a quick read and well worth the price for those serious about an MBA
