Sources Of The Making Of The West, Volume I: To 1750: Peoples And Cultures

Synopsis

Sources of The Making of the West provides written and visual documents closely aligned with each chapter of The Making of the West. This two-volume collection reinforces the major political, economic, social, and cultural developments in the textbook by allowing students to engage directly with the voices of those who experienced them. Over thirty new documents and visual sources highlight the diversity of historical voices — including both notable figures and ordinary individuals — that shaped each period. To aid students in approaching and interpreting documents, each chapter contains an introduction, document headnotes, and questions for discussion.

Customer Reviews

This actually came bundled with the textbook itself when I ordered it, and I hadn't known it was coming. When I saw it I was more excited about this little book than the textbook itself. I always hate it when I'm reading a textbook and it will reference some great text from the time that has great importance, and then I have to get online and find the source material in order to read the full text, but here it comes with a book put together for you with all of that in one place. The consideration of the authors/compilers in this action towards a studious student body is something that I am grateful for, and I guarantee I will be making great use of this sourcebook.

My Sources of Making the West Vol I arrived today. I checked out the book and everything was as described, it was a bit rougher, I suppose, than I was expecting, but this was also my first time buying a used textbook. The product is in pretty good condition for being a used paperback, the

cover and pages were all there. Overall, I am very pleased with my purchase.

This is for a northwestern university basic history course, recommended text book. It does give me more insights to the western history from various writers.

Great choice for a college student. Saved tons of money and in perfect condition. I would highly recommend this route over a local book store.

The book came in the condition that was described. It is just what my daughter needed for her college class assignment.

Grade saver forgot my book at home 30 mile round trip from school. Had a paper due in two hours.
