Customer Reviews

I am testing on 6/22, and was out of CARS practice. It's already May but NO ONE else has such a dedicated CARS only book out yet. I have plenty of science practice but, like many need more CARS and I'd rather pay for this than for another full length exam. I decided to give this a try because I liked the NS MCAT strategy books too. The passages are tough but they resemble the AAMC CARS stuff incredibly well, not too long, not too short. Very little of the subjective ambiguities that plague the Kaplan and EK verbal practice. Plus, they got rid of all natural science passages just like the real MCAT. I am 1 full section in and here's what I got so far: The explanations are really

helpful. Unlike some other books/tests, with each Q they tell me why each wrong answer is wrong, which is WAY more helpful than just having the right answer explained. The sections all have at 1 sample passage from each AAMC topics (Art, History, Social science etc...) so you can get varied practice. I don't know if this was done intentionally but I like it. Sometimes I don't quite buy their right answer but that's inevitable and it's never due to contradiction, just some subtlety I guess I missed (again, just like the awful AAMC :-). When you are doing the passages there is space for note taking and in the explanations there are recommendations on what terms should have been highlighted. They also provide a quick summary of key terms and relationships (in note form) with each paragraph, along with a concise summary of the main idea for each passage in the explanations. Flipping to this has been really helpful in allowing me to figure out if I read the passage right before I went on to the questions (Do this early in your studies!!!).-----Update on 7/13-----Overall a good purchase. 9/10. This was a resource that is sorely needed in the MCAT 2015 landscape so thank you to Nextstep for finally getting something out there. If you need more CARS or are running low and need more AAMC like verbal, get this one. Ended up with a 85-100% on my preliminary score report. CONS: Some of the answer explanations I just don't buy. I feel this is a problem with all the cars material I used (except for the AAMC stuff). It's not as bad as EK 101's tortured logic, but not as clear cut as the AAMC stuff. The questions tend to ask about detail more often than the AAMC does, but each passage also has 7 Qs, while the AAMC passages only have ~ 5-6 so it's understandable I guess. It did teach me to read more carefully but I'd like to see more Qs on complex ideas, incorporating outside info into the passage (AAMC skill 3) because that was my toughest CARS area to improve on.

It's a mixed bag. Some are AAMC like, and some are just outright different from the style of AAMC passages and questions. Honestly this book should only be used as "burn through" material and save EK101 and TPRH verbal passages and AAMC closer to your test date.

I finished the first round of passages and I am extremely disappointed by this book. There are NUMEROUS errors throughout. For example: it will ask you to look for a keyword in paragraph 2 and describe it using contextual clues. Well, that would be doable if the word were actually present in the passage. Further, the explanations are extremely poor and vague. Essentially, you cannot learn from your mistakes. I wish Kaplan would create a practice book, such as this, because while the idea is great, Schmedeker's quality is miserable. I don't care how brilliant this author is. If he doesn't have the decency to proofread his book or hire someone proficient enough to do it for him,

he isn't worth is salt in producing further publications.

This book is decent, and provides a lot of extra CARS passages. However, I wouldn't make this my first book; some of the questions in this book do not seem similar to the real AAMC-type MCAT questions. The bigger test prep companies provide much better CARS passages that actually resemble the real AAMC test. However, once you run out of passages to do, this book does indeed provide the necessary practice. It's a pretty good book, but make sure you've completed other books first before you switch to NextStep.

I really such at cars section. And I never really understood/comprehended the passage. So having a real guise that annotates key terms, cause and effects, paragraph summary, and main point really helps to check whether I got the juice out of each paragraph. The question answers that are reasoned and supported from front to back really help me fine tune why I'm getting this question wrong. I love this book for doing its best for explaining everything . Worth buying if you are not a native speaker.

I bought this book for practice, hoping that it would consist of quality material. Unfortunately, I have been disappointed so far, to the point where I feel the need to write this review. Some problems I have with the book:1. Some answers do not give thorough explanations. Reason for why choice A is wrong? A is wrong.2. Compared to actual practice tests, the questions and answers are unpolished and appear to be made by amateurs. That being said, the book has many passages, which is good for quick practice and warming up. For that it gets 3 stars. I would definitely use a different book for thorough CARS review. I don't want to compromise my thinking skills by reviewing their ambiguous and sometimes illogical answers.

Definitely helping me do better in CARS. I know a majority of Pre-Meds have trouble with this particular section on the test, and the only way one can get better is by practicing more and more. I took a practice test and scored a whopping 3 points higher than prior to reading this 108 passage book. Lots of practice and definitely worth the money spent.

For its price this is an amazing resource for practicing for the MCAT. The passages are a little harder than what you will see on the actual MCAT exam (though maybe a little shorter). Some of the questions are not representable of the actual test so I would suggest also getting a supplement. The

key to acing the reading section is practice and this book definitely gives it to you!
