Customer Reviews

Definitely prepared me for exactly what the test would be like. Passed with with ease thanks to this book. It's a must buy!

I've taken the basic exam, and did ok. Unfortunately military points, and other factors I won't get into here, okay is not enough. This book is the exam. The methods he recommends using involving making up your own stories to help with memory (something with sex usually works for me) has its advantages, although I think he overplays it in the book. I'm not completely through it, I still have mathematics left, but at this point I must say it is worth the money. And in my humble opinion, you get what you pay for, and more. However this is just 1 of 2 books with the words "Police Exam Prep" in the title that I bought, I'll let you know how the other one turns out.

Will help you pass multi-choice tests. There is a system to taking police exams. If you are not familiar with the system, then you will fail. Read books like this one and get a feel for the system. Develop experience this way, and it will help you improve your test scores. It's not what you know, it's how you know.

I scored an 84 out of 100 taking a county police test after reading this book briefly. If you actually take more time to study it more it will prepare you better. The personality questions on the test I took were all about yourself which is no right or wrong answer but I'm guessing they didn't like mine. Overall I was ranked 226 out of around 2000 people testing.

OK. Thank you. I love this book. a great book for theoretical exam preparation to police. the product is very good and I am now more prepared.

I just received my package today and it was packaged very well. I have just skimmed the book and it already seems like it will help me with my exam. I did pretty well on my first try, but barely failed, so I am hoping that this will put me where I need to be.

This book prepares you for all types of law enforcement exams, not just for the police. Any type of law enforcement would benefit from using this as one of the many manuals available and the price is fantastic. Fast and great wrapped shipping.

One of the best books for the exam. I bought it used and you can't beat the price.
