Roger Cotter that gave it a 1 star rating obviously did NOT read the description. First thing it states IS the clinical studies..A good example would be "forks over knives" it's not about forks and knives...that's why it's best to ALWAYS read the description.I apologize if I sound rude but it's annoying when people write reviews that aren't helpful when they haven't taken the time , all of 10 seconds to read the description of the book.
