The Modern Survival Manual: Surviving The Economic Collapse

Synopsis

The Modern Survival Manual is based on first hand experience of the 2001 Economic Collapse in Argentina. In it you will find a variety of subjects that the author considers essential if a person wants to be prepared for tougher times: -How to prepare your family, yourself, your home and your vehicle -How to prepare your finances so that you don't suffer what millions in my country went through -How to prepare your supplies for food shortages and power failures -How to correctly fight with a chair, gun, knife, pen or choke with your bare hands if required -Most important, how to reach a good awareness level so that you can avoid having to do all that These are just a few examples of what you will find in this book. It's about Attitude, and being a more capable person and get the politically correct wimp out of your system completely.

Customer Reviews

1)The mindset of the American survivalist movement was set by Mel Tappan several decades ago:
a) Retreat to a small town 400 miles or so from large cities b) Become self-sufficient. By and large, other survivalist writers have uncritically accepted Mel Tappan's strategy --because they wrote based on uncritical acceptance of a theory, not on actual practical experience.2) However, Ferial argues persuasively against Tappan's strategy based on Ferial's experiences in surviving Argentina's economic collapse. He notes that government will always survive, that it will confiscate food and other supplies from the countryside to feed the cities, and that it will maintain the rule of law. All of which significantly affect one's survival plans and stockpiling. For example, he notes that open carry of assault rifles will get you arrested and imprisoned (the wealthy will ALWAYS maintain

a police force to protect them) -- and that a concealed pistol and folding pocketknife is more practical.3) Money will be of PRIME importance --not a curious artifact. Mel Tappan could afford to ignore this because he had married an wealthy heiress.4) Ferfal agrees with Mel Tappan that isolated retreats in the rural countryside are likely to become what police called "secondary crime scenes" --places where residents are tortured by bandits into revealing hidden stores and are then murdered. He and Tappan both agreed on the importance of being part of a tight-knit, mutually-protective community.3) What led American survivalists --and Mel Tappan -- into error was that they lacked security clearances and hence knowledge of US Government plans to maintain itself and its control even in the worst disaster: Major Nuclear War.

I have a background from one of the most famous military elite units in the world; I'm trained in many "black arts", have been to wars and revolutions and I'm getting paid mega bucks to look after people. I don't say this to brag, just to state that I'm not a daydreaming wannabe. I got a lot out of the book, can attest to that the tips actually are sound and that I learned something from the book, so will you. The author bases his writing on his experience living with his family in Argentina the last few years. The book tells regular people how to live through extraordinary times. There is much non nonsense information about, kit, tactics, food and how to cope as a family during a crisis or a breakdown of society. If you have seen the news the last couple of years you realize it might soon affect YOU and your family. Contrary to what many books and authors tell you: even after a major economic and political crises life goes on, it's just "different"...Actually I read this book when it first arrived a few months ago. Having dumped into "FerFal"'s homepage while researching Argentina as a country to relocate to. I found his homepage giving extremely good and sound advices, both about Argentina but also security in general. A lot of books are written about survival. I first got interested in the subject in the late 70s, and the books from then are still around, some good, some dated. With the current state of the world we see an avalanche of new books joining the classics, and some old ones that never were classics in the first place gaining new fame. Most "survival" books are unrealistic and at times naive. For instance on fighting and weapons, either they have a fantasy aspect to what is required or they overlook it completely.
